“ Chuck is what I always called him. He was my company's Authorized Inspector and I first began working with him in 1973. Chuck was so very respected as our A.I.. I learned a lot about quality inspection just being around him. I always knew he loved his family and his church very much. His knowledge of the ASME Code impressed me always. I have lots of memories of the times working with him. I will share just one that impressed me and will never forget. Our company had a supervisor at that time who abused his authority. Chuck came into the office one day and I said, Chuck what needs to happen when a supervisor removes rework tags and throws them away. I remember the look on his face when he said, I'll jerk that damn certificate off the wall and there be no more product approved until this situation is resolved. Well those words were all needed to get it resolved. Chuck was a great man and I was blessed to know him.
